

VELORA

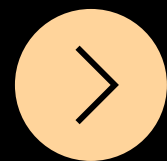

AI-POWERED COLLABORATIVE IDE

Build Faster · Code Smarter · Deploy
Instantly

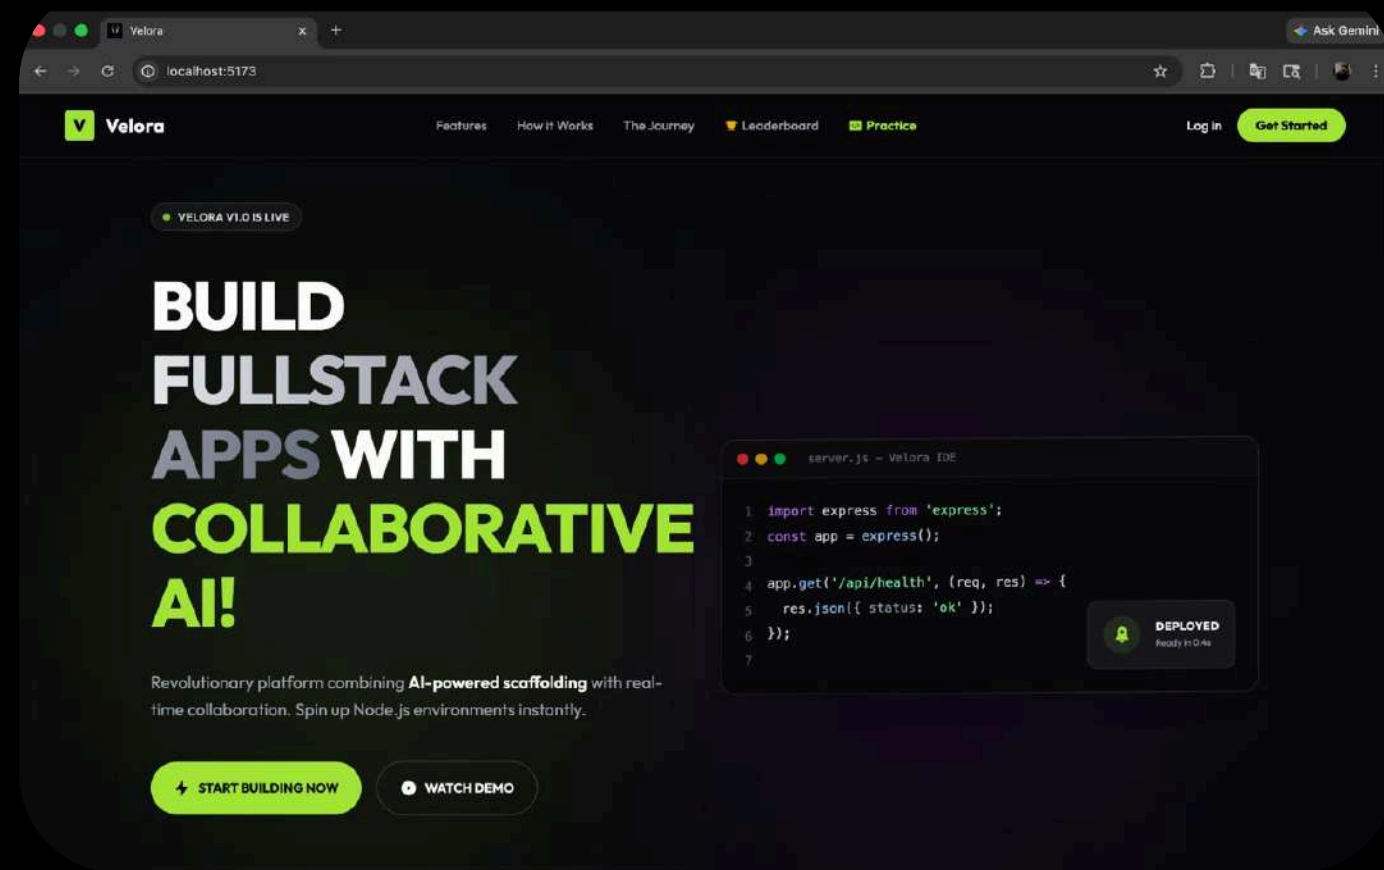

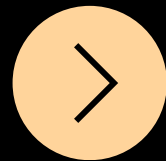

PROBLEMS IN MODERN DEVELOPMENT

Why Developers Struggle Today?

- Environment setup is time-consuming
- No real-time collaboration in traditional IDEs
- AI tools require switching between platforms
- No full-stack execution in browser
- Security & performance issues go unnoticed

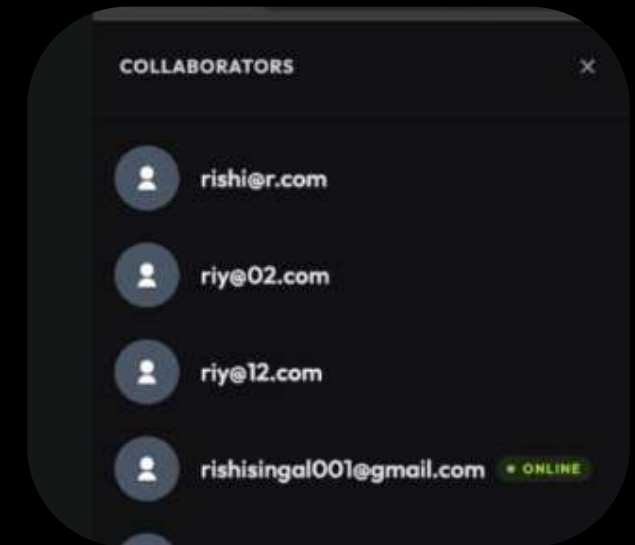

INTRODUCING VELORA

What Velora Offers

AI Integration

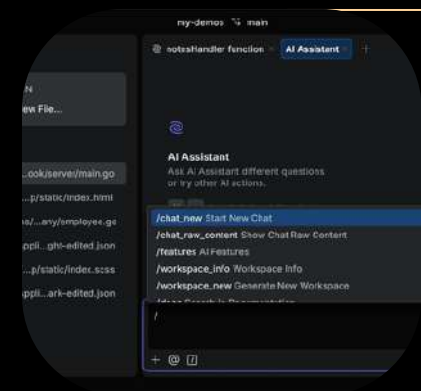

- Generate full projects using AI
- Smart code suggestions

Real-time Collaboration

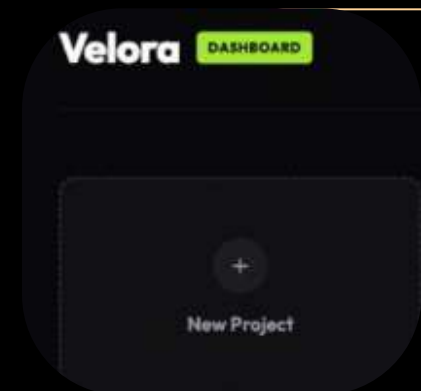

- Multiple users work together
- Live updates instantly

Build Faster with Generative AI

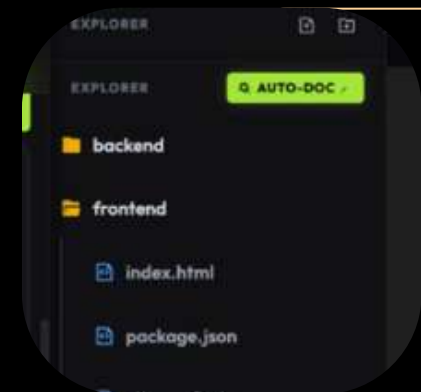

Chat-to-Code

- Type @ai generate login page
- AI writes code instantly

Project Generation

- Creates full file structure
- Multi-file output

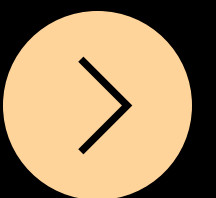

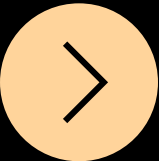

Auto Documentation

- Generates README.md
- Explains project automatically

AI PAIR PROGRAMMER

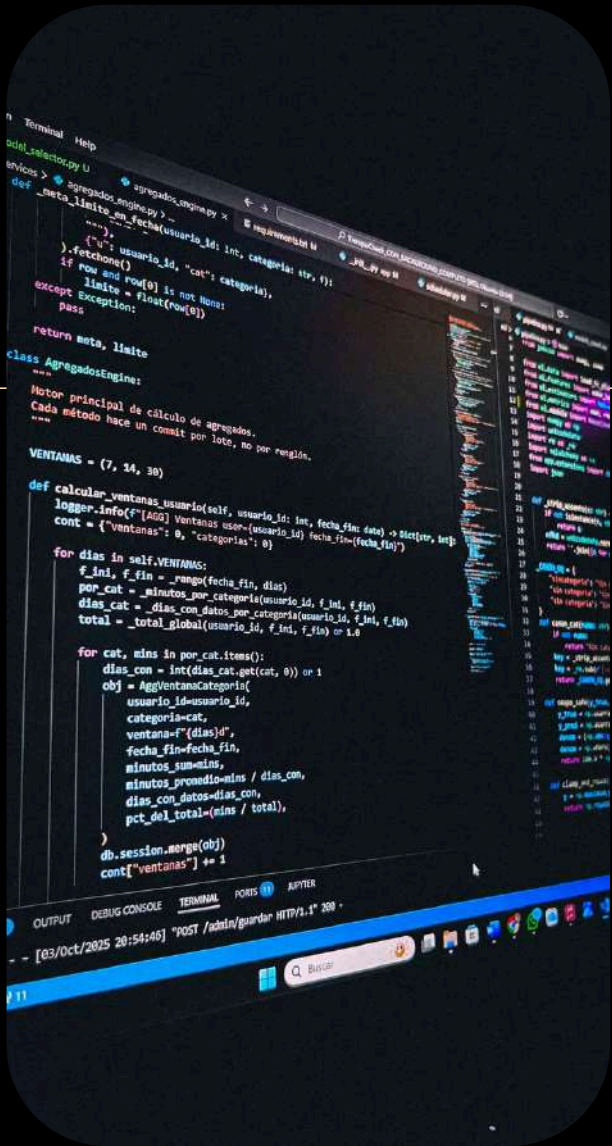

REAL-TIME COLLABORATION

Work Together, Instantly

Work Together, Instantly

- Multiple developers work on the same project
- Live updates using WebSockets
- See changes instantly in real-time
- Built-in chat for team communication

Like Google Docs, but for coding

COLLABORATORS

Build Faster
with
Generative AI

- Use @ai prompt to generate code
- Creates full project structure
- Generates multiple files instantly

AI works like your personal coding assistant

AI-POWERED
CODE
GENERATION

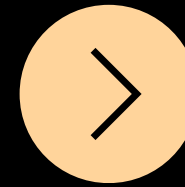

Security Analysis

- Detects vulnerabilities (XSS, injections)
- Identifies risky code patterns

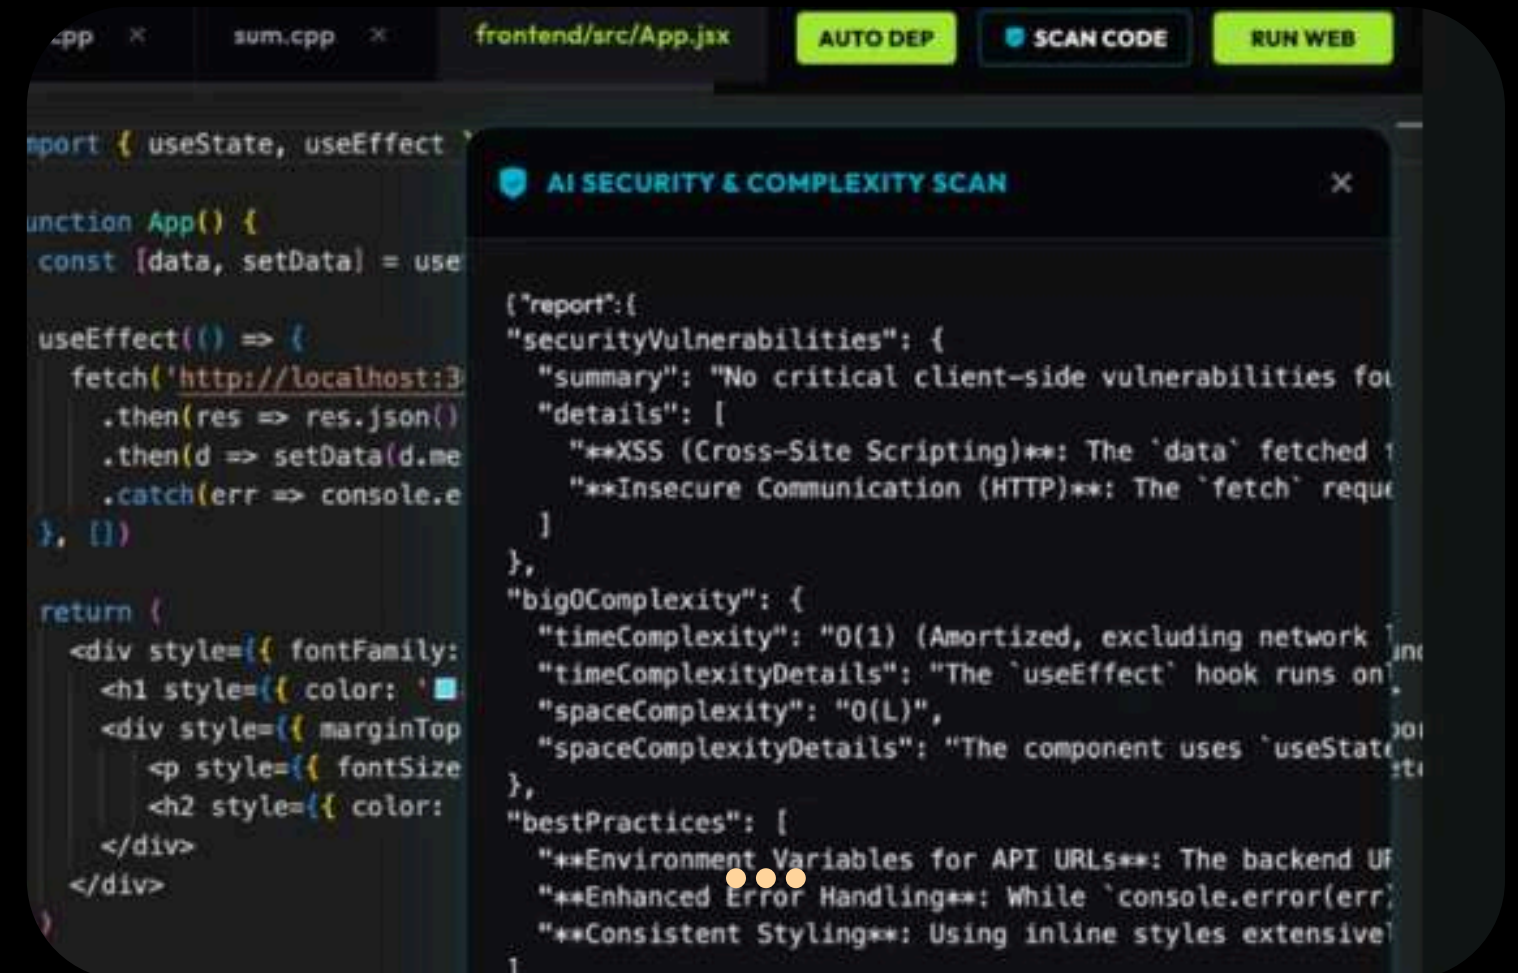

Performance Optimizaton

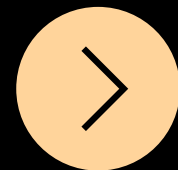

- Analyzes time & space complexity
- Suggests improvements

SECURITY & PERFORMANCE SCANNER

Problem Database

All Topics

All Difficulties

ARRAY EASY 7. Search in Rotated Sorted Array	ARRAY EASY 8. 3Sum	ARRAY EASY 9. Container With Most Water
ARRAY EASY 10. Merge Intervals	ARRAY MEDIUM 11. Insert Interval	ARRAY MEDIUM 12. Sort Colors
ARRAY MEDIUM 13. Next Permutation	ARRAY MEDIUM 14. Combination Sum	ARRAY MEDIUM 15. Jump Game
ARRAY HARD 16. Merge Sorted Array	ARRAY HARD 18. Move Zeroes	ARRAY HARD 19. Majority Element

BROWSE PROBLEMS

RUN CODE

SUBMIT

C++17

```

1 class Solution {
2 public:
3     vector<int> twoSum(vector<int>& nums, int target) {
4         unordered_map<int, int> mp; // value -> index
5
6         for(int i = 0; i < nums.size(); i++) {
7             int complement = target - nums[i];
8
9             // Check if complement already exists
10            if(mp.find(complement) != mp.end()) {
11                return {mp[complement], i};
12            }
13
14            // Store current element
15            mp[nums[i]] = i;
16        }
17
18        return {}; // just for safety
19    }
20 };

```

TESTCASES

TEST RESULT

Accepted

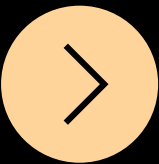

PASSED Test Case 1

Input (stdin)

nums = [2,7,11,15], target = 9

Expected Output

- Solve coding problems (C++)
- AI evaluates your solutions
- Earn XP based on difficulty
- Compete on global leaderboard

Challenges in
Implementing
Velora

KEY
CHALLENGES

AI Dependency

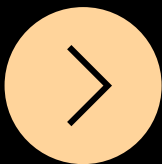

Global crises and raw material shortages disrupt just-in-time delivery models.

Performance Limitations

Adopting automation and clean energy requires massive investment and long ROI periods.

Learning Curve

Environmental and safety standards are stricter, demanding constant adaptation.

FUTURE SCOPE

Expanding the Power of Velora

GitHub Integration

- Import/export repositories
- Seamless project management

Voice-to-Code

- Convert speech into code
- Faster development

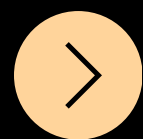

Multi-Language Support

- Support for Python, Java, etc.
- Expand usability

AI Improvements

- Better code generation
- More accurate suggestions

THANK YOU

Thank you for your time and attention
Any questions?

Velora – The Future of Coding
